Drawdown Management App

Active Object Dependencies

Account: **OPJQICB-DEV** (Adamas) · App: `DRAWDOWN_MANAGEMENT_DAILY` · Warehouse: `REPORTING_WH` · Updated: 2026-10-06

Only objects used by the running app code (`app-daily/` API routes) and everything they depend on, traced from the live definitions on the account. All objects are in the `CYGNET_TRANSFORMATION` database unless noted.

Layer 1 — Queried directly by app API routes

Object	Type	Schema	App route	SQL operations
`VW_DRAWDOWN_WELL_HEADER`	View	**APP**	`/api/drawdown-status`	SELECT
`VW_DRAWDOWN_WELL_MASTER`	View	**APP**	`/api/well-attributes`	SELECT
`FN_DRAWDOWN_WELL_VALUES_LTTB`	Table function (SQL)	**APP**	`/api/timeseries`	SELECT via TABLE()
`ASSET_COMMENTARY`	Table	CORE_COMMON_MODEL	`/api/commentary` `/api/chart-annotations`	SELECT, INSERT, UPDATE, DELETE
`ASSET`	Table	CORE_COMMON_MODEL	`/api/commentary`	SELECT (in INSERT subquery)

Layer 2 — Referenced by Layer 1 views and functions

Object	Type	Schema	Used by
`VW_DRAWDOWN_WELL_MASTER`	View	**APP**	VW_DRAWDOWN_WELL_HEADER (also Layer 1)
`VW_DRAWDOWN_WELL_TAG_VALUES`	View	**APP**	FN_DRAWDOWN_WELL_VALUES_LTTB
`VW_DRAWDOWN_WELL_TAG_VALUES_CURRENT`	View	**APP**	VW_DRAWDOWN_WELL_HEADER
`VW_ASSET_ATTR_DAY_CALCULATED_LATEST`	View	CORE_COMMON_MODEL	VW_DRAWDOWN_WELL_HEADER
`TAG_VALUE_DAY`	Table	CORE_COMMON_MODEL	FN_DRAWDOWN_WELL_VALUES_LTTB

Layer 3 — Base views

Object	Type	Schema	Used by
VW_ASSET_ATTR	View	CORE_COMMON_MODEL	VW_DRAWDOWN_WELL_MASTER, VW_DRAWDOWN_WELL_TAG_VALUES, VW_DRAWDOWN_WELL_TAG_VALUES_CURRENT, FN_DRAWDOWN_WELL_VALUES_LTTB
VW_ASSET_ATTR_TAG_VALUE	View	CORE_COMMON_MODEL	VW_DRAWDOWN_WELL_TAG_VALUES
VW_ASSET_ATTR_TAG_VALUE_LATEST	View	CORE_COMMON_MODEL	VW_DRAWDOWN_WELL_TAG_VALUES_CURRENT
DIM_WELL_COMPLETION_MASTER	View	EDW.ANALYTICS	VW_DRAWDOWN_WELL_MASTER

Layer 4 — Base tables (CORE_COMMON_MODEL)

Table	Rows	Used by
ASSET	46,832	VW_ASSET_ATTR, VW_ASSET_ATTR_TAG_VALUE, VW_ASSET_ATTR_TAG_VALUE_LATEST, VW_ASSET_ATTR_DAY_CALCULATED_LATEST, VW_DRAWDOWN_WELL_HEADER, FN_DRAWDOWN_WELL_VALUES_LTTB, commentary route
ASSET_ATTR	1,204,322	VW_ASSET_ATTR, VW_ASSET_ATTR_TAG_VALUE, VW_ASSET_ATTR_TAG_VALUE_LATEST, FN_DRAWDOWN_WELL_VALUES_LTTB
ASSET_ATTR_DAY	27,282	VW_ASSET_ATTR_DAY_CALCULATED_LATEST, FN_DRAWDOWN_WELL_VALUES_LTTB
ASSET_COMMENTARY	4	App routes (direct CRUD)
ATTR_DFNTN	340	VW_ASSET_ATTR, VW_ASSET_ATTR_TAG_VALUE, VW_ASSET_ATTR_TAG_VALUE_LATEST, VW_ASSET_ATTR_DAY_CALCULATED_LATEST
TAG	676,922	VW_ASSET_ATTR, VW_ASSET_ATTR_TAG_VALUE, VW_ASSET_ATTR_TAG_VALUE_LATEST
TAG_VALUE	835,235,938	VW_ASSET_ATTR_TAG_VALUE
TAG_VALUE_CURRENT	214,636	VW_ASSET_ATTR_TAG_VALUE_LATEST
TAG_VALUE_DAY	9,128,033	FN_DRAWDOWN_WELL_VALUES_LTTB
UNIT	42	VW_ASSET_ATTR, VW_ASSET_ATTR_TAG_VALUE, VW_ASSET_ATTR_TAG_VALUE_LATEST, VW_ASSET_ATTR_DAY_CALCULATED_LATEST

External dependencies (outside CYGNET_TRANSFORMATION)

Well and completion master attributes come from EDW, joined on the Enertia well code. The MDM_RAW and TRANSFORMATION sources are owned outside the drawdown project and were not traced further.

Object	Type	Used by
`EDW.ANALYTICS.DIM_WELL_COMPLETION_MASTER`	View	APP.VW_DRAWDOWN_WELL_MASTER
`EDW.ANALYTICS.DIM_PROPERTY_MASTER_ALL_SYSTEMS`	View	DIM_WELL_COMPLETION_MASTER
`MDM_RAW.ENERHUB_RAW.WELL`	Source	DIM_WELL_COMPLETION_MASTER
`MDM_RAW.ENERHUB_RAW.COMPLETION`	Source	DIM_WELL_COMPLETION_MASTER
`TRANSFORMATION.CROSS_REFERENCE.DT_303_PROPERTY_MASTER`	Source	DIM_PROPERTY_MASTER_ALL_SYSTEMS

Drawdown calculation (writes ASSET_ATTR_DAY — run separately from the app)

The app reads `DAILY_EST_DRAWDOWN` from `ASSET_ATTR_DAY`. Those values are produced by the daily task and load procedures below, not by the app.

Object	Type	Schema	Role
`TASK_LOAD_ACTIVE_WELLS_DAILY_DRAWDOWN`	Task	**APP**	Daily 06:00 Central on REPORTING_WH; recalculates the previous Central day for all active wells
`SP_LOAD_ACTIVE_WELLS_DAILY_DRAWDOWN`	Procedure	**APP**	Calls SP_LOAD_WELL_DAILY_DRAWDOWN for every active well
`SP_LOAD_WELL_DAILY_DRAWDOWN`	Procedure	**APP**	Replaces DAILY_EST_DRAWDOWN rows in ASSET_ATTR_DAY for one well and date range
`SP_EST_DAILY_DRAWDOWN`	Procedure	**APP**	Older merge-based loader; also calls FN_EST_DAILY_DRAWDOWN
`FN_EST_DAILY_DRAWDOWN`	Table function (SQL)	**APP**	Reads TUBING_PRESSURE from VW_ASSET_ATTR_TAG_VALUE for one well and passes it to FN_EST_DAILY_DRAWDOWN_CORE
`FN_EST_DAILY_DRAWDOWN_CORE`	Table function (Python)	**APP**	Stable-decline algorithm: excludes surface excursions, derives daily drawdown

Source: `sql/functions/fn_est_daily_drawdown.sql` (both functions), `sql/tasks/task_load_active_wells_daily_drawdown.sql` (task).

Changes since the 2026-10-02 version

- `ANALYTICS.VW_CM_WELL_MASTER` replaced by **`APP.VW_DRAWDOWN_WELL_MASTER`**.
- Well-to-meter matching now uses `ENERTIA_COMPLETION_ID`. `ANALYTICS.VW_METER_WELL` and the `CODE` table are no longer used.
- Drawdown in the well list now comes from `VW_ASSET_ATTR_DAY_CALCULATED_LATEST`, and shows the most recent day. The misspelled `..._CALCUATED_LATEST` view no longer exists.
- `FN_DRAWDOWN_WELL_VALUES_LTTB` reads `ASSET_ATTR_DAY` and `TAG_VALUE_DAY` directly.
- `EDW.ANALYTICS.DIM_WELL_COMPLETION_MASTER` is a view, not a table.
- App warehouse changed from `CYGNET_TRANSFORMING_WH` to **`REPORTING_WH`**.
- New section for the drawdown calculation objects. The drawdown functions are consolidated into `FN_EST_DAILY_DRAWDOWN` and `FN_EST_DAILY_DRAWDOWN_CORE`; the interim `_V2` functions were dropped.

> **Note:** the source code still contains a `/api/drawdown-daily` route that reads `DEV.CORE.V_WELL_DRAWDOWN_DAILY`. That view doesn't exist on Adamas and the UI doesn't call the route, so it is excluded.

Summary

Total objects the app depends on: 24

- 5 APP objects: 4 views and 1 table function
- 4 CORE_COMMON_MODEL views
- 10 CORE_COMMON_MODEL tables
- 2 EDW.ANALYTICS views
- 3 external source objects (MDM_RAW, TRANSFORMATION)

Plus 6 drawdown calculation objects (1 task, 3 procedures, 2 functions) that populate `ASSET_ATTR_DAY` outside the app.

Generated by Cortex Code from the live OPJQICB-DEV object definitions and the app-daily/ API routes.
